Subject: Application for a national visa for study: M.Sc. [Programme], [University]

Dear Sir or Madam,

I have been admitted to the M.Sc. [Programme] at [University], starting in the winter semester [year] (admission letter attached). I am applying for a student visa to take up this place.

I chose this programme because it combines embedded systems with condition monitoring, the subject of my B.Tech project and of my work since 2024 as a test engineer at a pump manufacturer in Pune. The modules [Module 1] and [Module 2] build directly on what I have done, and the programme is taught in English, so I can follow it from the first day while I continue learning German (A2 now, B1 course ongoing).

I chose Germany because its machine-building industry is where predictive maintenance is being developed, and public universities like [University] work closely with it. Studying there gives me both the methods and the industrial practice that I cannot find together in India.

My living costs for the first year are covered by a blocked account at [provider] (confirmation attached). My parents will support me beyond that, and I may work part-time within the limits the law allows for students.

After graduating I intend to work as a condition-monitoring engineer, in Germany or with a German company in India. I understand the conditions of a student residence permit and will comply with them.

Thank you for considering my application.

Yours faithfully,
Ananya Rao
